

### VIP registration form - JSCC only!

Yes! If you are a JSCC practitioner you may use this FORM to register one week early!  
**Print, Complete and Fax**  
no later than Sunday, Nov. 12, 2018.

*A VIP form that is not from a JSCC practitioner will not be processed.*

#### **Important Registration basics:**

- 1) Open Registration begins **Monday, November 20, 2018 at 9:00am!**
- 2) We cannot reverse a registration to give a discount. Click here for details: [Jones Discounts](#) - Note: To receive the repeat discount you may write "REPEAT" on the [REGISTRATION FORM](#) and fax it to the number on the form.
- 3) Registrations must be made under the practitioners name/account who will be attending the course. If not, the registration will be cancelled and the position forfeited to the next waiting person.
- 4) Once a registration is completed all Jones Institute policies apply. Visit [www.jonesinstitute.com](http://www.jonesinstitute.com), homepage for details in the "Quick Links & Information" box.

#### **A NEW COURSE for 2018 FCS MS2-Muskuloskeletal, Part 2**

MS2 explores advanced concepts in musculoskeletal treatment including cartilage and bone (periosteal) treatment. Periosteal FCS is capable of correcting osseous deformities including tibial varum/valgum and leg length discrepancy. Periosteal dysfunction is the primary pathophysiology behind tendonitis in all regions of the body and is also the primary residual dysfunction seen in virtually all fracture and bone contusion cases. When combined with neural FCS techniques, it can quickly resolve intractable conditions such as tarsal tunnel syndrome and idiopathic peripheral neuropathy. Cartilaginous (fibrocartilage) FCS is the answer to chronic cartilage pain including spinal disc (annulus) pain, shoulder / hip labral pain, medial / lateral meniscus symptoms and other disc pathologies including the TMJ fibrocartilage. The skills gained in MS2 will give therapists skills enabling them to easily correct conditions that are virtually impossible to treat with any other form of medical intervention or manipulation. *Prerequisite: FCS MS1*
